Project 1 Documentation

Evan Eisenman | CIS 250 | CRN 11518 | 9/13/2025

Input

Name	Type	Initial Value	Description
userValX	Signed Double Word	0	Used for the X value in X+Y-Z
userValY	Signed Double Word	0	Used for the Y value in X+Y-Z
userValZ	Signed Double Word	0	Used for the Z value in X+Y-Z

Output

This application outputs a few prompts to fulfill project requirements along with 2 "dumps" of the registers to display the values stored in them to the user along with the evaluation of X+Y-Z that is stored in the eax register and the end of the applications lifetime.

Misc

No current issues with the application. Only resource used outside of the assigned text was future sections of the text book used mostly to find other function built into irving32.

Greg

I have never written documentation for my other programing class so please forgive if it is lacking an information. Any feedback to improve documentation for future programs is greatly appreciated
